

Safety Instruction & Cautions for Safety Use

Instructions and Cautions for Safety :

Before you use the product, which is introduced in this brochure (“the product”), be sure to read carefully & thoroughly all the explanations on the product in this brochure or consult with our dealer nearby or our Sales Dept. on how to use the product correctly for ensuring your safety. Your correct use is required.

As for installation, wiring and maintenance work, only technicians qualified for such work must do these works for safety. No other works than such technicians must not do any of these work.

If you want to apply the product to the specific usages in the fields of nuclear power controlling, aerospace, medicine, transportation system and any other specific purposes, be sure to contact our Sales Dept. for safety consultation.

Be sure to set up a proper safety device in case of applying the product to any facilities which might cause any fatal accident or which might cause any serious physical damage if the product happens to become out of order.

Instructions on Storage

Never store our products under any environment which may cause physical deterioration of their resin and may lead to metal corrosion.

Be sure to store our products within the Ranges of “Working Temperature”/ “Working Humidity” or “Storage Temperature Range.” Be sure to store them under freezing-free or dew-free circumstances.

Keep our products away from direct sunlight when you store them.

Before you store our products, be sure to take them out of the corrugated carton for storage. Such corrugated carton may release a trace of sulfide gas. Never store our products kept in such carton for a long time.

Instructions and Cautions on Usage

Before you use our products, be sure to read carefully & thoroughly all the explanations on the product in this brochure or consult with our dealer nearby or our Sales Dept. on how to use the product correctly for ensuring your safety. This is because our products may be different from each other in safety-caution-wise. Your correct use is required.

Never use our product in specific irregular circumstances where dusts, corrosive gas or any other abnormalities exist.

In case of using chemicals such as oils or adhesive agents on our products, their plastic parts may become deteriorated. Therefore, consult with our Sales Dept. for correct usage.

Before fastening the screws, follow the screw-fastening torques specified in each product's specifications.

Use a proper vacuum cleaner to clean our products and surrounding machines after installation or at the time of maintenance. Never use air-blow type cleaners, which may push dusts deep into the inside of the product and this may cause problematic disorder of the product.

The protection grade written on this brochure is the one indicated on the attachment panel surface. The inside of the panel is not protected. Therefore, users are required to protect the inside of the product against any dusts and other possible irregularities.

Never disassemble our products by yourselves even though you want to request us to inspect our product at the time of any abnormalities. If you unauthorizedly disassemble our products by yourselves, the cause of the problem becomes hard to be identified.

【Warranty Period】 and 【Warranty Scope】

【Warranty Period】

The period of warranty shall be one (1) year after the delivery of the product at the place designated by the customer.

【Warranty Scope】

In case that any breakdown happens arising out of the responsibility of the Seiko Electric during the above Warranty Period, The Seiko Electric shall, at its own responsibility, replace the affected or broken parts or repair such parts. The following cases, however, shall be regarded as out of and not be covered by this Warranty Scope :

- (1) If the product was used under other conditions or environment than specified in this brochure and/or specifications.
- (2) The product was broken down due to any other reasons than specified in the above or any other reasons outside of the product itself.
- (3) The breakdown or any other abnormalities of the product arose out of disassembly, remodeling or repairing by any other parties than the Seiko Electric.
- (4) The breakdown or any other abnormalities of the product arose Act of Gods and any other disasters which were out of control of the Seiko Electric.
- (5) The breakdown or any other abnormalities of the product arose out of any other usage or handling than the specified one of the product.

For your reference, Product Warranty hereby mentioned shall mean the warranty of the delivered product only. The Seiko Electric shall be exempted from any liabilities against any other damages triggered by the breakdown of the delivered product.

The appearance/specification of our products may be subject to be modified without prior notice for the purpose of product improvement.
