

# EARTH LEAKAGE RELAY

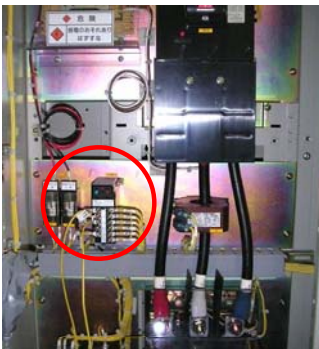

Electronic Control Devices Unit

## Earth leakage relays with all kinds of features line up

### Low cost earth leakage relay

Type GD-B

It is a low-cost type with simplified functions, and used for various kinds of panels such as motor control centers, etc.

### Multifunction earth leakage relay

Type GD-C  
Type GD-D

It is a multifunction type with various options for current sensitivity and operating time.  
There are surface type GD-C and embedded type GD-D.

### Concentration of Earth Leakage Relay

Type GD-E

It is the assembled type of the earth leakage relays for four circuits or eight circuits.  
Also, it realizes multifunction and high performance. It can show the current value and maximum value of the earth leakage by digital method.

### Earth leakage relay with two-stage alarm

Type GD-W

It is the type with two-stage alarm that can detect and output heavy earth leakage and light earth leakage.

It can output the alarm when there is a light earth leakage, and break the circuit when there is a heavy one.
